

# Reimagining Hickox Hall

The Hickox Hall task force is soliciting ideas from YOUTH & ADULTS for planning the new Hickox Hall dining and program facility at Schiff Scout Reservation. The Design and Construction Group at BSA National asked the committee to think "outside the box" as the replacement facility is planned. One idea is to reconstruct Hickox Hall on the site of the Pioneer Dining Hall to make the facility more central to camp site and programs. The site is an open field and held a dining hall the same size as Hickox Hall. The location of the Pioneer Dining Hall is on this 1955 map, with current camp programs noted:

Tell us what you think about this idea – submit your comments on page two

## Reimagining Hickox Hall – Alternate Site for Hickox Hall

The Design and Construction Group at BSA National asked the committee to think "outside the box" as the replacement facility is planned. One idea is to reconstruct Hickox Hall on the site of the Pioneer Dining Hall to make the facility more central to camp site and programs.

### Why it's a good idea:

Check all that applies if you are in favor of relocating the dining hall for the following reasons:

- Closer to parking lot – it will not seem as long to get to when registration is at the dining hall.
- Easier when a member of the unit has to go and meet visitors at the parking lot.
- Closer to locations from mid-day program sites in archery, activities field, craft lodge,
- Relocating the dining hall site is acceptable if it curtails excessive vehicle use and reduces pedestrian-vehicular conflict.
- The activity field can be used for formation instead of the road.
- Current dining hall site can be used as a shaded activity area for formal and informal events.

---

### Why it's not a good idea:

Check all that applies if you are not in favor of relocating the dining hall for the following reasons:

- The dining hall should be replaced at the current site – it's traditional.
- The walk from the activity areas before and after meals is enjoyable, especially when we are leading groups of boys to and from sites.
- Current dining hall site lets us use the road for assemblies and it's an enjoyable experience.
- Current dining hall site is acceptable as long as excessive vehicle use is kept to a minimum.
