On November 16th, 2013 the College of Commissioner Science and Continuing Education was hosted by Suffolk County Council. TRC Venturing supported many of the sessions for enhancing commissioner support to Venturing crews. Along with the numerous courses offered to the adults, the program wanted to include a youth Venturer to share the ideas and experiences of Venturing.

Samantha R. (presenter in picture) is the Vice President of Communication for the Theodore Roosevelt Council Venturing Officers Association (VOA) and the Vice President of Program for Venturing Crew 577. She created a power point for the program. Samantha’s informative and enthusiastic presentation included aspects of Venturing and role of the VOA.

All benefited and appreciated her time and talents as they learned so much about Venturing. Samantha’s time and efforts were greatly appreciated by the Venturing unit commissioners attending the session! BULLY to Samantha!
